Languages: HTML and XML, CSS, JavaScript, PHP, C++, Java, Python
Technologies: MySQL, MongoDB, Express, Node.js, Mongoose, Tailwind, Sanity,React.js, JQuery, Bootstrap 5, AJAX Methods, GitHub

WORK EXPERIENCE

Mobile Software Engineer Intern — *CheaprEats*   May 2020 - Jul 2020
· Refactored the codebase which significantly improved the productivity of senior engineers who were easily able to navigate the improved codebase and ship features considerably faster
· Worked alongside a senior mobile engineer to create a Menu Item component and a GPS component that points to the nearest restaurants using **React.js**
· Prepared clear documentation for the codebase and explained the architecture improvements made to stakeholders in a professional manner on **Confluence**
· Participated in weekly team meetings and provided input on deadlines, designs and enhancements
· Worked closely with engineers, and users to support planning & execution strategies to improve work efficiency

Forklift Operator — *Walmart*   June 2020 - August 2021
· Received and unloaded incoming products, verified shipment accuracy and inspected for damage, loss or defects
· Transported products from storage locations to shipping processing, to shipping staging and into trucks or trailers in all department
· Operated forklifts, shelf pickers, motorized pallet jacks, tractors with zero mishaps causing property damage or personal injury
· Developed and maintained strong knowledge of products including how each product must be transported

Store Manager — *Ultramar*   Sep 2021 - Current
· Maintained strong proficiency in **Customer Service** and **Team Management** to provide benefits to the store
· Maintain and control **inventories and orders** in all department
· Ensured application of merchandising standards, policy and procedures
· Control gauging and record in point of sale terminal

PROJECTS

ShareMe — *JavaScript, React.js, Tailwind CSS and Sanity.io*   Dec 2020
· Developed a full stack social media application using React, Tailwind and Sanity to share and download images
· Integrated Google Authentication preventing users to login, post, and comment
· Managed state of application using Sanity and deployed using Netlify **Netlify**

Personal Portfolio — *Web Development*   Jan 2021
· Created a responsive personal portfolio website hosted with Github Pages showcasing skills, experience & projects using **HTML5, CSS** & **JavaScript**
· Used the CSS grid system in combination with Bootstrap 5

EDUCATION

Ontario Tech University, Candidate for Bachelor of Software Engineering   Sep 2019 - Mar 2023
· GPA: **3.23**, Cumulative GPA: **81.7%**
· **Relevant Courses:** Systems Programming, Data Chmagement Systems, Design and Analysis of Algorithm, Artificial Intelligence, Computer Networks, Software Quality, Operating Systems

The Web Developer Bootcamp 2020 — *Udemy*   Dec 2020
· Topics Covered: HTML/CSS, JavaScript, Node.js, MongoDB, Express.js, Mongoose, Passport.js
